

## **FACULTY OF SECURITY AND SURVEILLANCE**

**NSQF LEVEL SCHEME** 

**SECTOR: FIRE AND SAFETY** 

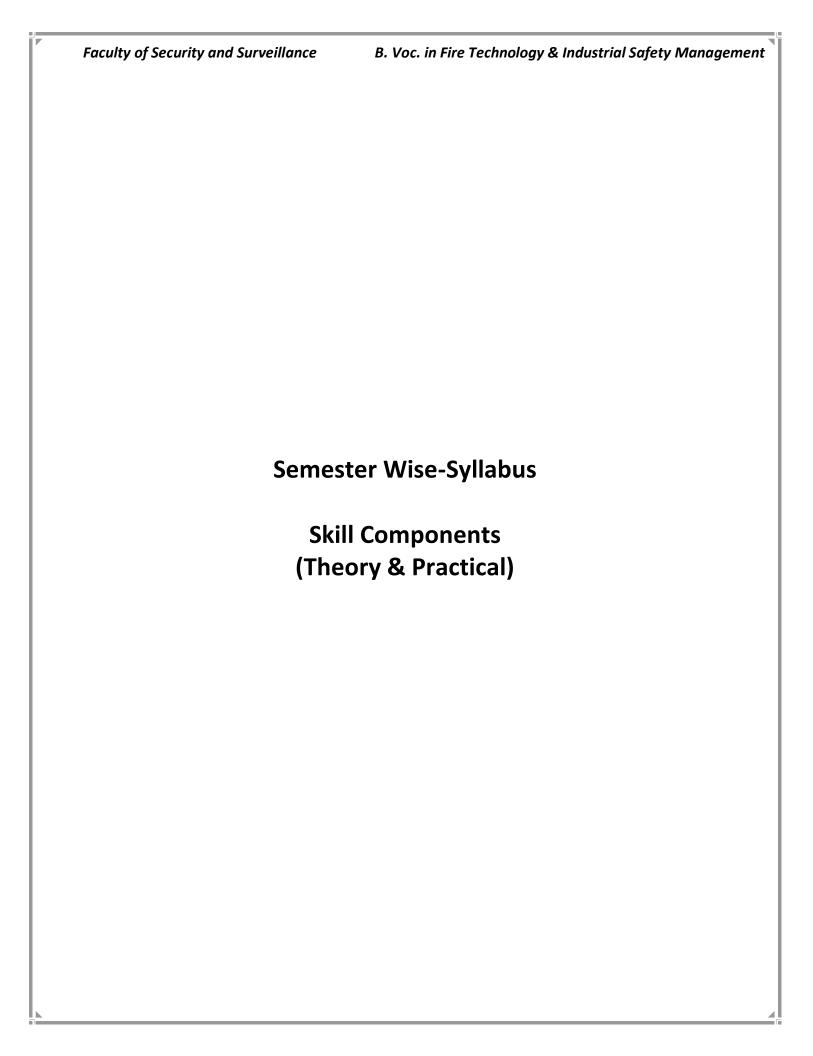

**PROGRAMME** 

B.VOC IN FIRE TECHNOLOGY AND INDUSTRIAL SAFETY MANAGEMENT

**NSFQ LEVEL 7** 

**REGULATION** 

**SEMESTER 1**ST

## Course Name: B. Voc. in Fire Technology and Industrial Safety Management

## Semester 1st

			Credits					Eose (Hrs.)		
Code	Subject Type	Subject	Theory	Practical	Self/Industry/Project	Tota Credi		Т	Р	S
Skill Comp	Skill Component (Location : Institute)									
	SC	Fire Engineering Science	2	1	0	3	3	1		0
	SC	Fire Protection & Fire Fighting Appliances	2	1	0	3	3	2		0
	SC	Fire Fighting Process	1	3	0	4	3	3		0
	SC	Fire Service Administration	1	1	0	2	3	1		0
(OJT)/Qualification Packs) Location: Industry Partner)										
Internship/OJT/ Drill Practical		0	0	6	6	0	0		0	
TOTAL		6	6	6	18	0	0		0	

## **Skill Subjects**

	Skill Component -I : Fire Engineering Science							
Component	Unit (Module)	Subunit (Session)	Learning objective	Duration in hour	Credit			
Theory Demonstration Practical	Chemistry of Fire	<ul> <li>(1) Basic Concept</li> <li>(2) Chemical Reaction</li> <li>(3) Heat Formation and Heat of Combustion</li> <li>(4) Mechanism of Combustion</li> <li>(5) Flash Point, Fire Point.</li> <li>(6) Fire Triangle, Components of Fire.</li> <li>(7) Fire Tetrahedron, Chain Reaction.</li> <li>(8) Spread of Fire, Extinction of Fire.</li> <li>(9)Back Drought, Delayed Back drought</li> </ul>	Understanding basic principles of Fire & Safety Engineering.	15				
Theory Demonstration Practical	Electrical Fire	<ul><li>(1) Sources of Electricity</li><li>(2) Fuse short circuit</li><li>(3) Common causes of Electric Fire</li><li>(4) Fire Fighting measures for Electric Fire</li></ul>	Causes of Electrical Fire & Its Prevention.	05	3			
Theory	Hydraulics	(1) (1) Water Pressure And Weight (2)Water weight and water per cu. Ft (3) Friction loss of water	Usage of Water for Extinguishing Fire	10				
Theory Demonstration Practical	Fire Extinguisher	Wet chemical powder Fire Extinguishers (2) Water CO <sub>2</sub> Gas Cartridge Fire Extinguishers (3) Pressure Fire Extinguishers (4) Foam Type Fire Extinguishers (5) Dry Chemical Powder Fire Extinguishers (6) CO <sub>2</sub> Gas Type Fire Extinguishers (7) Operation, Care, Maintenance and Refilling of Extinguisher	To Familiarize with various types of Fire Extinguishers.	10				
Theory	Water Supply & Water Relay system	<ul> <li>(1) Sources of Water,</li> <li>(2) Type Of Hydrant,</li> <li>(3) Care And Maintenance Of Hydrants,</li> <li>(4) Types of Water Relay System &amp; Its Advantages and Disadvantages</li> </ul>	To Familiarize with usage of water resources & Hydrants for Extinguishing Fire.	5				

Component	Unit (Module)	Subunit (Session)	Learning objective	Duration in hour	Credit
Theory Demonstration Practical	Building Design	(1) General Requirement of Building Design in Fire Prevention (2) Wall, Roofs, Basements, Floors and Openings (3) Electrical Installations, (4) Adopting Building for other Purpose (5) Access for Fire Appliances (6) Control of Smoke and Hot Gases (7) Escape from Buildings (8) Stores and other Buildings	Fire protection engineering is the application of science and engineering principles to protect people and their environment from destructive fire, which includes: analysis of fire hazards. Mitigation of fire damage by proper design, construction, arrangement, and use of buildings.	10	3
Theory Demonstration Practical	Installation of Fire Protection Systems in Buildings	(1) Introduction of Sprinkler System and their Care and Maintenance. (2) Elementary requirements of Drenchers, (3) Rising Mains (4) Hose Reel and Down-comer (5) Fire Alarms System.	Understanding their scope of authority and where that authority is derived from and successfully identifying fire and life safety hazards associated with occupancies.	10	
Theory	Rural fire	<ul> <li>(1) Difficulties of fire fighting in rural</li> <li>(2) Combustible of rural fire</li> <li>(3) Causes of rural fire</li> <li>(4) Method of firefighting.</li> </ul>	Fire and Life Safety Educators are invited to speak at a variety of venues. Careful planning can make the difference between an excellent visit and a mediocre and Accustomed with different fire situations and fire fighting using extinguishers.	10	
Theory	Aircraft Fire	<ul> <li>(1)Design and construction of Airport,</li> <li>(2) Safety Measures of Airport,</li> <li>(3) Causes of fire in Aircraft and there control measures,</li> <li>(4) Emergency plan at Airport.</li> </ul>	Able to offer a range of courses to the wider aviation industry The course aims to provide the technical knowledge and practical skills in fire fighting & rescue operation. Plan and survey Airport & Aircraft, port and ship for rescue system and fire fighting system on it.	10	

Facul	ty of Security and S	urveillance B. Voc. in Fl	B. Voc. in Fire Technology & Industrial Safety Management			
	61.	(1)Ship construction and there	-do-	5		
Theory	Ship and Dockyard Fire	types,				
	, , ,	(2) Fire protection on board				
		ship,				
		(3) Fire Fighting System at				
		Dock yard,				
		(4) Fire Plan and Diagram.				

_	Skill Component -III: Fire Fighting Process							
Component	Unit	Subunit (Session)	Learning objective	Duration	Cre			
	(Module)	(4)		in hour	dit			
Thoony		(1) Introduction of Small Gears	<b>Small gear</b> is the term commonly used in <b>fire</b>					
Theory Demonstration		(2) Breaking gears (3) Cutting gears	service when referring to a					
Practical	Small Gears	(4) Rescue gears	miscellany of tools and					
riacticai	Siliali Geals	(5) Transport gears	general- <i>purpose</i> tool that	05				
		(6) Miscellaneous	is frequently used in	03				
		(7) Turning over gears	turning over and pulling					
		(8) Care and Maintenance of	operations Identify and use					
		small gears.	of small and special gears.					
		(1) Delivery hose	Learning					
		(2) Delivery hose coupling	<b>Outcomes</b> Recognize the					
Theory		(3) Suction hose coupling	standard terminology in					
Demonstration		(4) Branches and Nozzle	relation to <i>hose.</i>					
Practical	Hose and	(5) Monitors		10				
	Hose Fitting	(6) Collecting Breeching		10				
		(7) Dividing Breeching						
					4			
		(8) Adapters						
		(9) Wrenches						
		(10) Hose Ramps						
The area.		(1) Types of Foam compound	-do-					
Theory Demonstration	Foam and	(2) Foam making equipment						
Practical	Foam	(3) Working procedure of						
Tuctical	making	equipment		10				
	Equipment	(4) Description part of Foam						
		making equipment						
		(5) Care and maintenance of						
		Foam Equipment						
		(6) Storage of Foam compound.						
<b>T</b> I	Ladders	(1) Hook ladder	Methods of using ladder in	40				
Theory		(2) Extension ladder	practical field.	10				
Demonstration Practical		(3) Escape T.T.L./Snorkel Ladder						
riduludi		(4) Care, maintenance, standard						
		test ladder.						
		(1) Introduction and Functions of	Select and prepare the					
Theory		Pumps	hydrant and pump system					
Demonstration	Pump and	(2) Types of Pumps (Force Pump,	for proper application.					
Practical	Primers	Lift pump, Centrifugal pump)		10				
		(3) Care & Maintenance of						
		Pumps. (4) Introduction and functions of						
		Primers.						
		(5) Types of Primers.						

	Skill Component -IV : Fire Service Administration								
Component	Unit (Module)	Subunit (Session)	Learning objective	Duration in hour	Cre dit				
Theory	Disciplined	<ul><li>(1) Introductions</li><li>(2) Importance of discipline</li><li>(3) General Principals of discipline.</li><li>(4) Essential of Discipline and Outward Signs.</li></ul>	Apply safe working practices.	10					
Theory Demonstration Practical	Watch room Procedure	<ul> <li>(1) Identification of Communication requirement of Fire Service,</li> <li>(2) Control Room, Equipment Station,</li> <li>(3) Turn out Area, Topography and Telephone Call Area, Mobilizing boards and maps.</li> <li>(4) Radio Communication and use of VHF sets.</li> <li>(5) Log, Occurrence book and Incident Reporting.</li> </ul>	Identify communication system in different organization and their scope of use.	10					
Theory	Fire Service Organisation	<ul> <li>(1) Ranks and appointment in Fire Services</li> <li>(2) Administration of State/City Fire Services (3) Maintenance of Fire Station</li> <li>(4) Responsibilities of Fire Station In charge</li> <li>(5) Documentation at Fire Station</li> </ul>	Plan and execute fire station administration.	10	2				
Theory	Practical Fireman ship	<ul><li>(1) Quality of a Good Fireman</li><li>(2) Duties of Fireman</li><li>(3) Basics of Fire Fighting</li></ul>	-do-	10					
Theory Demonstration Practical	Special Service call	<ul> <li>(1) Rescue Operations from Sewers,</li> <li>Gas Leakage at Industrial Sites, Wells,</li> <li>Rivers, Ponds, Collapsed Buildings,</li> <li>Road Accident and Elevators.</li> <li>(2) Fireman Lifts</li> </ul>	-do-	5					

Objective:- To Train an individual in handling Fire Safety Equipment and Enable him/her to function as a Fire Technician.

Ref. Books:- Agni Suraksha - Mr. N. K. Verma

Industrial safety health & Environment Management System - Mr. R.K Jain
Industrial safety management and Health - Mr. M. K. Tarafdar

Industrial Safety - Mr. Misti

Scheme of Examination: - 1 Semester (6 Months)

Learning outcome:-After successful completion of Fire Technician course, an individual will be capable of performing the duties of Fire Technician/Fireman. He/she will be able to minimize occurrence of Fire Incidents and assist in minimizing the losses from Fire.
